Monkey by Jenx

Highly adjustable standing system that provides prone to upright positioning for children from 9 months to 4 years.

Specifically designed to appeal to young children and their families, Monkey by Jenx is an ideal fun and gentle introduction to standing. Offering smooth and easy angle adjustment, even with the child in the product, Monkey can go from upright at 90° right down to 20° prone – perfect for gradually building tolerance to standing as part of a therapy programme. The capacity for outstanding thoracic and pelvic support coupled with flexible leg positioning make the Monkey prone stander a great option for almost every child.

Bright and Friendly

Caring for a child with physical disability or developmental delay in their early years can be an overwhelming period of dealing with multiple pieces of equipment, treatments and medical terminology. With this in mind, Monkey by Jenx has been carefully designed to offer the best in early intervention support in a gentle, bright and friendly way.

Parents often comment on the huge difference this thoughtful design has in helping them understand the use and benefits of supported standing equipment for the young children.

Adjustable Hip Straps and Pads

Fastened in the centre and then adjusted from either side to keep a child's hips in midline. This is the key feature that keeps the child close to the standing support.

The tool-free adjustments on the pelvic straps and pads can help control pelvic rotation, tilt and obliquity easily, and help create stable and symmetrical weight bearing.

Removable Abduction Block

Provided as standard to help create and support an abducted standing posture.

Flexible Growth

The chest and hip boards can be independently altered and fixed allowing you to exactly accommodate the proportions of each child.

Quick Set-up

The Monkey comes as a complete unit meaning that what you receive out of the box is ready to be quickly and easily set up (with very few adjustments required) so your child can start using it straight away.

Comfortable Upholstery

Fully upholstered chest, hip and leg boards help make standing more comfortable for children, which also helps to increase their tolerance of standing.

Standing is a great way to improve your child's outlook on the world as well as their physical development.

Improves blood pressure & circulation

Helps digestion, bowel & bladder emptying

Encourages bone & muscle development

Gives a new perspective and ways to participate

Aids respiration & speech

Helps relieve pressure created during sitting

Supports pelvis, thighs & feet so children can join in everyday activity

Provides opportunities to increase social skills

Children also gain huge psychological advantages from standing, as well as those important physical and development benefits.

Smooth & Simple Angle Adjustment

The angle of the frame can even be adjusted with the child in the standing frame.

Sandal Straps

The **Sandals** fully open at the back, making self transfers easier for the child and carer.

De-rotational Hip and Pelvic Straps

The straps fasten in the center and can be adjusted independently on each side, allowing for a midline position to be easily achieved and maintained. This combination of buckles and hook-and-loop material ensures that once the straps are correctly adjusted, they stay securely in place. This makes it difficult for siblings or classmates to tamper with them and keeps everything looking neat and tidy.

Always Configurable Accessories

Monkey Prone Stander

Suitable for children from 9 months to 4 years. The **Monkey** basic configuration provides prone to upright positioning and includes:

- Chest, hip and leg support boards
- Chest and hip straps
- Footboard
- 4 lockable, swivel castors
- Adjustable chest, hip and leg positioning pads
- Intergrated angle adjustable tray with bowl
- Size 1 sandals

Sandals

Straps open from the back, facilitating easy stand transfers into prone standing. Monkey comes with size 1 **Sandals** as standard – larger children or children wearing splints may find size 2 **Sandals** more appropriate.

Sandal Raising Blocks

Available for every size of Jenx **Sandals**, the raising block kits give the **Sandals** that extra bit of height where needed! Use to accommodate for leg length discrepancy or to raise the height of the footplate on any product to maximise the available growth.

Note: One kit needed per individual **Sandal**.

Activity Frame

Great for encouraging head control and hand/eye co-ordination. Easy to attach and adjust. Comes with two clips for attaching toys or other items.

Grab Bar

Perfect for children who need to fix one hand to increase functionality.

Always Adaptable

Integral Angle Adjustable Tray

Provided as standard, with both bowl and smooth tray infill for a wide variety of different activities and play.
